Note. Since the majority of persons with mother tongues other than English or French have a mother tongue which corresponds or is related to their origin, this table abbreviates the list of mother tongues other than English or French into two groups as shown. Thus for any particular origin, as for example Chinese, the mother tongues can be read as: English, French, Chinese and all other. See also the Introduction under "Mother Tongue" for explanations regarding groups of related mother tongues and origins used under this arrangement.

British Isles origins include English, Irish, Scottish, Welsh and Manx.

N.o.s. = Not otherwise specified.

Scandinavian includes Danish, Icelandic, Norwegian and Swedish.

Nota. Étant donné que la majorité des personnes dont la langue maternelle est autre que l'anglais ou le français et correspond ou se rattache à leur origine, le présent tableau ramène les autres langues maternelles autres que l'anglais et le français aux deux groupes indiqués. Ainsi, pour toute origine particulière comme par exemple, l'origine chinoise, on lira comme langue maternelle: anglaise, française, chinoise et toutes autres. Voir aussi l'introduction, sous "langue maternelle" pour les explications relatives aux groupes de langues maternelles et l'origine apparente des employés en vertu de cette disposition.

Les origines des Îles Britanniques comprennent les origines anglaise, irlandaise, écossaise, galloise et mannoise.

N.a.é. = Non autrement énuméré.

Les origines Scandinaves comprennent les origines danoise, islandaise, norvégienne et suédoise.

TABLE 49. Population by mother tongue, specified origins and sex, for provinces and territories, rural farm, rural non-farm and urban, 1951

TABLEAU 49. Population rurale agricole, rurale non agricole et urbaine, selon la langue maternelle, certaines origines et le sexe, provinces et territoires, 1951

| Mother tongue and sex Langue maternelle et sexe | Total | British Isles origins — Origine britannique | French — Française | German — Allemande | Italian — Italienne | Jewish — Juive | Nether- lands — Néerlandaise | Polish — Polonaise | Rus- sian — Russe | Scan- dina- vian — Scandi- nave | Ukrai- nian — Ukrainienne | Other Euro- pean origins — Autres origines euro- péennes | Asia- tic origins — Origines asiatiques | Native Indian and Eskimo — Indienne et esqui- maude | Other and not stated — Autre et non déclarée |

APPENDIX A
POPULATION BY SINGLE YEARS OF AGE

APPENDICE A
POPULATION À CHAQUE ANNÉE D'ÂGE

POPULATION BY SINGLE YEARS OF AGE

While information was collected in the 1951 Census by single years of age, classifications by age were tabulated by five-year age groups. Any tendency on the part of persons to report ages in round numbers thereby becomes relatively insignificant. The five-year age groupings are sufficiently detailed for most purposes. Cases do arise, however, where figures by individual years are desirable. The following graduated age table by single years of age was therefore prepared in the Social Analysis Section of the Census Division. These data were calculated in such a way that the discrepancies arising from the clustering at certain ages, particularly around the ages ending in "0" and "5", have been largely eliminated.

The population in the groups over 4 years of age has been graduated by means of a formula whereby the five-year totals reproduce exactly the published census figures. In effect, the formula puts a simple curve through each year of age in such a manner that the total under the curve for the five-year age group is the same as that actually enumerated. The curves for successive five-year intervals are made to run smoothly into one another. In order to avoid the difficulty and inaccuracy of doing this graphically, the process has been reduced to formulae which are adapted to ordinary calculating machines.

The population at each individual age under 5 years was calculated on the basis of Vital Statistics records of births and deaths and a census count of immigrants under 5 years of age. Accurate birth and death records as well as comparatively little emigration by persons in the very young age groups permit more accurate information to be obtained by this method than by the formula method used for succeeding age groups.

POPULATION À CHAQUE ANNÉE D'ÂGE

Bièn que, lors du recensement de 1951, les renseignements aient été recueillis par année d'âge, les classements par âge ont été établis par groupes quinquennaux. Toute tendance de la part des personnes à déclarer leur âge en chiffres ronds devient donc relativement négligeable. Les groupements quinquennaux sont suffisamment détaillés pour la plupart des besoins. Il se présente, cependant, des cas où il est nécessaire d'avoir des chiffres pour chaque année. Le tableau ci-après, où la population est classée par année d'âge, a donc été préparé à cette fin par la Section des études sociales, de la Division du recensement. Ces données ont été calculées de telle façon que les discordances issues des groupements à certains âges, particulièrement aux environs des âges se terminant par un "0" et par un "5", ont été éliminées en majeure partie.

La population des groupes âgés de plus de 4 ans a été graduée au moyen d'une formule qui fait que les totaux quinquennaux donnent exactement les chiffres publiés du recensement. De fait, au moyen de cette formule, on fait passer une courbe à travers chaque année d'âge de telle façon que le total qui paraît sous la courbe pour le groupe quinquennal est le même que celui des personnes effectivement dénombrées. Les courbes pour les intervalles quinquennaux successifs sont telles qu'elles passent facilement l'une dans l'autre. Pour éviter la difficulté et l'inexactitude que supposerait une représentation graphique, le procédé a été ramené à des formules qui sont adaptées aux machines à calculer ordinaires.

La population à chaque année d'âge de moins de 5 ans a été calculée d'après les chiffres de la Statistique de l'état civil sur les naissances et les décès et d'après un comptage de recensement des immigrés de moins de 5 ans. Des chiffres exacts sur les naissances et les décès, ajoutés à une émigration relativement peu considérable chez les personnes des groupes d'âge très peu avancé, permettent d'obtenir des renseignements plus exacts au moyen de cette méthode qu'au moyen des formules employées pour les groupes d'âge suivants.

I. Population by single years of age and sex, for provinces and territories, 1951

I. Population à chaque année d'âge et selon le sexe, provinces et territoires, 1951
